

Instructions for Installing Canon Pixma MX410 Driver for Windows 7/Vista/XP

1. Click the Canon website link on the library's website.
2. Scroll down the page and select your operating system and version.
3. Click **Drivers**.
4. Click the **MX410 series MP Driver Ver. 1.00** option.
5. Click **I Agree - Begin Download**.
6. Either run the file or save it. If you save it, double click on its icon to run it. If you are asked to allow changes to your computer, click **Yes**.
7. On the Welcome screen click **Next**.
8. Make sure **USA, Canada, Latin America** is selected for your place of residence. Click **Next**.
9. Click **Yes** to accept the license agreement.
10. For the connection method, select **Use the printer with wireless LAN connection**. Click **Next**.
11. When it says **Turn on the printer**, make sure the printer is turned on. If not, press the On button then click **OK**.
12. The MX410 should be automatically detected. Make sure it is selected and click **Next**.
13. Click **Complete**. You are now ready to print.

IMPORTANT

The installation will set the Canon Pixma MX410 as the default printer. If you have another printer already installed on your laptop, such as a printer you have at home, you will need to change it back to the default after you have finished printing at the library. To do this, follow the steps below.

1. Click the Start button/menu. For Windows 7, click **Devices and Printers**. For Vista, click **Control Panel** then **Hardware and Sound** then **Printers**. For XP, go to **Settings** then click **Printers and Faxes**.
2. Right click on the printer you wish to set as default.
3. Click **Set as Default Printer**.
